

## PRECAST BASE

### Precast Base Slabs

In instances where time-critical installations of culvert crossings are required, the “Precast Culvert Base Slab” is an ideal solution.

It is designed and manufactured to suit the Precast Concrete Portal crowns already manufactured by Aminto, and is profiled to suit the culvert.

Generally, culvert base slabs are cast with joints that are not watertight so that any excess ground water pressure (which accumulates under them) is relieved.
